VACANCY

Marine Superintendent (full time)

Location: Serooskerke (Walcheren, NL)

Publication date: 28-01-2026

Step into a role where your impact reaches from shore to sea!

At OOS International BV, we're seeking a Marine Superintendent who can elevate vessel performance, uphold the highest safety standards, and keep our offshore fleet operating at its best. As the vital link between our vessels, crews, and industry authorities, you'll play a defining part in ensuring every operation runs safely, smoothly, and with absolute professionalism.

Duties & Responsibilities (but not limited to):

The Marine Superintendent will be responsible for a broad range of operational, technical, and compliance-related activities, including but not limited to:

- Overseeing the vessels' daily operations, including hotel services, client requirements, and the inspection, repair, and maintenance of navigation and communication equipment.
- Serving as the primary point of contact between the vessel and the onshore organization.
- Supporting certification and verification processes, including liaison with classification societies and relevant authorities.
- Ensuring all inspection, repair, and maintenance procedures are properly implemented and adhered to.
- Contributing to budget planning for daily operational costs in cooperation with Line Managers and Shipboard Management, as well as supporting cost control and annual investment planning.
- Reviewing and approving Material Requisitions (MRs), Purchase Orders, and invoices.
- Coordinating with external companies and specialists regarding inspections, repairs, and maintenance activities.
- Supporting the maintenance and improvement of formal documentation, including policies, procedures, and strategic materials, in collaboration with Shipboard Management.
- Evaluating non-conformities, initiating corrective actions, and assisting with incident investigations when required.
- Assisting in identifying training needs and supporting the development of onboard training programs.
- Monitoring and interpreting applicable rules, regulations, and industry guidance related to marine and offshore operations.
- Maintaining the computerized planned maintenance system together with Shipboard Management and contributing to system improvements.
- Working closely with the HSEQ Department to ensure safe operations and compliance with occupational safety and health regulations, promoting a culture where all accidents are considered preventable.
- Traveling to vessels or project locations as required.

Education/Experience/Requirements

- Nautical Bachelor's Degree;
- Relevant experience in the offshore industry;
- Excellent skills in spoken and written English;
- Excellent problem-solving abilities and sound judgement.

What can we offer you?

- Professional Development
- International Work Environment
- Social and Team-Building Activities
- Competitive Salary
- Pension
